#### Herboliv+ is a Wild Animal Repellent and Crop Growth Promoter

##### Benefits of Herboliv+

- Controls crop damage from wild Elephants, Boars, Deer, Bison, Blue bull (Nilgai), Rats, Rabbits, Porcupine, Monkeys, Squirrel, Parrots, wild Birds and domestic animals like Cows.
- Acts as wild animal repellent + crop growth promoter (Results in yield increase)
- Controls pests and fungal diseases as well.
- Improves soil fertility and profile of root growth.
- Improves water retention in soil.
- Improves Shelf life of end product.
- Cost benefit ratio is very high.

Ingredients	% Value
Herbal Extracts	55%
Fermented Fruit Extracts	20%
Panchagavya	25%

##### Dosage:

- Both Foliar spray and soil application to be done for controlling nocturnal animals like wild boar, porcupine, rats, rabbits.
- Soil application is common for all Wild Animal control. Use 5 lit. per acre every month (5 ltr HERBOLIV+ + 8.5 ltr water). Maximum of 10 lit. per acre can be used if animal intrusion is very high.
- For Foliar spray 1 lit. HERBOLIV+ in 9 lit. water is the mixing ratio. For Monkeys, Squirrels, Parrots mix 2 ltr HERBOLIV+ in 8 ltr water. Thorough drenching of entire crop should be done.

##### Time of application:

- Spray once every week to control wild/domestic animal intrusion in first month and spray once every 15 days from second month onwards.
- During the absence of animals and wild birds also, spraying once in 15 days and doing once per month as soil application will help for excellent plant growth and can see multi fold increase in yield and will considerably reduce the production cost.
- During night time and rainy season, use innovative automatic timer controlled battery/motor operated sprinkler system to control wild animal intrusion.

Note: It is not toxic or harmful for wild animals or domestic animals

##### Precautions:

- Do not use hand pump sprayers
- Use power or motorized or battery sprayers only
- Do not mix with other materials
- Do not spray during hot sun & heavy wind blow
- Not to be ingested
- For Agriculture use only
- Shake the content well before use
- Use filter to remove any sediments while mixing HERBOLIV+ with water and put the filtered sediments in the field.
